## ACI Structural Journal VOLUME 88, 1991

Remove this section and include it with your January through December 1991 Volume 88 issues of the *ACI Structural Journal*.

Individually authored papers, committee reports, and abstracts of separate ACI publications are indexed in three categories:

1. Title.....**Deflections of composite steel-concrete beams subject to creep and shrinkage** (88-S63) Mark Andrew Bradford Sept.-Oct. 1991 ..... 610
2. Author .....**Bradford, Mark Andrew**—Deflections of composite steel-concrete beams subject to creep and shrinkage (88-S63) Sept.-Oct. 1991 ..... 610
3. Subject .....**Creep**—Composite beam time-dependent moment-curvature behavior (88-S63) Sept.-Oct. 1991 ..... 610

Numbers in the parentheses with each entry constitute the title number of the paper or report. The first

number is the number of the volume in which the paper appeared; the second number is the number of the paper in the volume. For abstracts, which are not assigned a paper number, the identifying abbreviation AB is given; i.e., (88-AB). The month and year indicate the issue in which the material appeared. Page numbers indicate the first page of the item.

Discussion is identified as "Disc." and is indexed under the paper title and the name of each contributor to the discussion. Only discussion which appears in V. 88 is covered in this index. To find discussion of a paper, check the notice given in the issue in which the paper appeared. This notice will indicate where any discussion that developed is published. A similar notice is given with the abstracts of symposia publications. Discussion of symposia papers usually appears one year following publication of the abstract.
